

Luxury Vinyl Tile or Plank Flooring

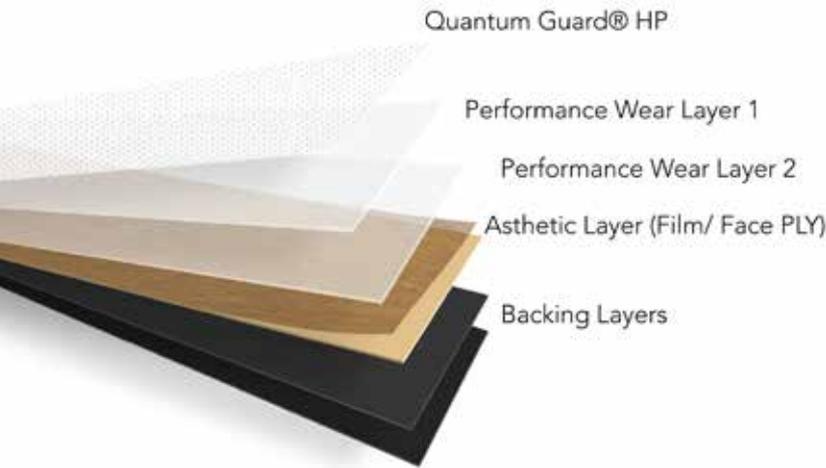

Luxury Vinyl Tile (LVT) or Plank (LVP)

Luxury Vinyl Tile or Plank is the most **functional flooring** in the market today. You can create individual and **personalized** installations for **each project**. Our LVT or LVP products offer natural colourways, surface textures of stone and ceramic, as well as a natural wood aesthetic. Luxury Vinyl Flooring is an **innovation** in resilient flooring, combining **resilience** with **modernity** and sophistication.

Luxury vinyl flooring is **well-suited** for a variety of spaces; hospitality, retail, educational, corporate office, healthcare, medical offices, and aged care.

Mannington Commercial LVT is with **Quantum Guard® HP** technology. The highest performance commercial **urethane finish** in the industry. The patented aluminum oxide UV cured wearlayer eliminates the need for polish, while enhancing durability, cleanability, appearance retention, and **slip resistance** when compared to standard LVT floors.

LVT and LVP collections

Anthology Collection

with 5 patterns inspired by weathered architecture, wood-grain-meets-ikat, and simple classic linearity. Anthology creates a unique approach to personalise your aesthetic with LVT, allowing designers to select one of the patterns and apply it to nearly any colour.

Connected Collection

a true design element. With an abstract styling and modern aesthetic. This collection is a modular system that enables designers to create a personalized installation for each project

LVT and LVP collections

Nature's Path Collection

a nature-inspired and abstract aesthetic brings more choices to the proven performance of LVT. A balanced collection of visuals in wood and natural materials that can be transformed into countless designs.

The Divergent Collection

a collection drawn from standing still. From appreciating beauty in our environment in an up close and personal way. A root level observation of the world around us.

Sustainability

	<p>ENVIRONMENTAL PRODUCT DECLARATION</p>	<p>EPDs communicate the comprehensive life cycle assessment of a product's environmental impact and facilitate transparency. Mannington EPDS conform to international standards and are 3rd party verified by SSC and NSF International.</p>
	<p>SOLAR ARRAY</p>	<p>At 3.3 acres, we have one of the largest solar arrays in the flooring industry generating 1,000,000 kilowatt hours annually.</p>
	<p>ENERGY LEADERSHIP</p>	<p>With one of the largest solar arrays in the flooring industry (3.3 acres in Salem NJ) and ambitious goals to improve energy efficiency by 25% over ten years, Mannington have an ongoing partnership with the Department of Energy to lead manufacturing into smarter energy use, as well as to reduce related carbon emissions.</p>
	<p>WATER REDUCTION</p>	<p>Water is a precious natural resource and a key component in manufacturing. By investing in technology and a continual emphasis on efficiency and lean manufacturing, Mannington have reduced the water use by more than 35% since 2007. They also actively help protect wetlands in the communities where they make flooring.</p>
	<p>3RD PARTY 12 CERTIFICATIONS</p>	<p>Certifications help navigate the world of green marketing claims. Mannington invest in ISO-14001 and environmentally preferable product certifications including NSF/ANSI-140, NSF/ANSI-332, FloorScore, and Green Label Plus. All of their products may contribute to multiple LEED and Green Globe credits.</p>
	<p>LOOP®</p>	<p>Mannington Commercial's LOOP® reclamation program is responsible end-of-life plan for the products they manufacture. Through the LOOP® reclamation, they can take back post-consumer carpet and closed-loop recycle it back into carpet. They also have closed-loop recycling processes in place for their VCT and LVT products and produce the only carpet-to-hard surface flooring – resilient sheet with 35% recycled content.</p>
	<p>RECYCLED CONTENT</p>	<p>Mannington actively seek out waste streams that clog America's landfills, looking for innovative ways to use them in new products. On average, 15 tons per month of drywall, the construction industry's largest waste stream, finds new life in their VCT products. Mannington also reclaim post-consumer carpet and tile from other flooring companies, as well as tires, telephone books, automotive glass, and other waste streams that contribute to landfills, incorporating them into carpet and hard surface flooring.</p>

Sustainability

	<p>PURPLE MARTINS</p>	<p>In the mid-1980s, Mannington began attracting migrating birds called Purple Martins to their New Jersey manufacturing campus as a more natural alternative to the use of pesticides. This “Purple Martin Project” has proven to be an incredibly environmentally friendly and cost effective way to control insects. Mannington employees are engaged in the banding and tracking of the birds.</p>
	<p>HONEY BEES</p>	<p>In 2009, as part of an effort to show how an industrial enterprise can coexist with the agricultural & farming community and positively contribute to both, Mannington’s New Jersey corporate site began to house honeybees, and now have 5 hives in Salem, NJ and 4 in Eustis, FL. The honey bees are thriving and each year they are able to enjoy and share the honey they produce.</p>
	<p>ISO 14001</p>	<p>ISO 14001 is a global environmental standard that provides a system for continual improvement in environmental performance.</p>
	<p>CRI GREEN LABEL PLUS</p>	<p>GL+ is an independent carpet testing program that exceeds the CHPS indoor environmental quality standards for low-emitting products used in commercial settings. All Mannington Commercial carpet products pass CRI Green Label Plus certification for low VOC emissions.</p>
	<p>CE MARK</p>	<p>Certifies that a product has met EU health, safety, and environmental requirements, which ensure consumer safety. Manufacturers in the European Union (EU) and abroad must meet CE marking requirements where applicable in order to market their products in Europe.</p>
	<p>CLIMATE REGISTRY</p>	<p>Mannington is dedicated to reducing our greenhouse gas emissions by 25% over 10 years. Since 2007, a 10% reduction can be attributed to energy efficiencies, process efficiencies, and use of renewable energy. Additional information can be found on theclimateregistry.org.</p>
