

Seam+ Advantage

Flooring transition strips in aged care can create a breeding ground for infection and bacterial growth, especially when a contaminating spill goes underneath a transition and is missed by cleaning and disinfectant. This can also cause mobility issues and unnecessary visual obstacles.

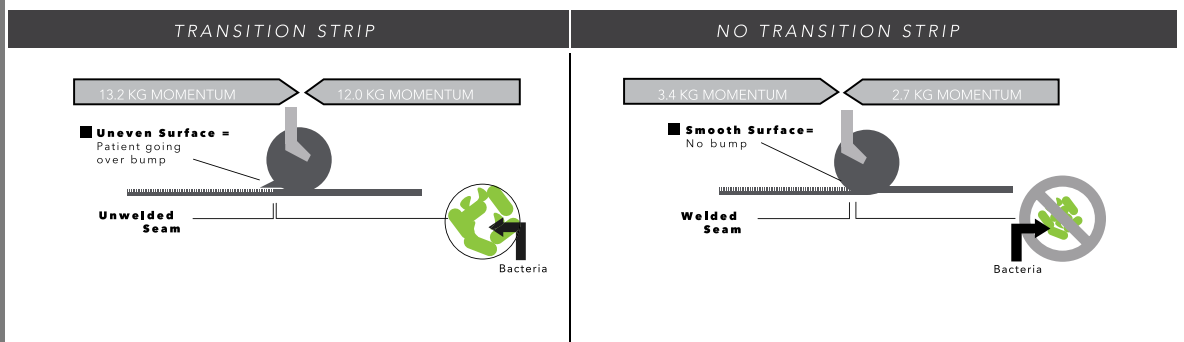

With **Seam + Advantage**, **Integra HP**® carpet can be chemically welded to **Quantum Guard HP**® resilient, creating a truly seamless transition from surface to surface. This elimination of transition strips throughout an entire facility allows for better infection control, better mobility, and better long-term performance. The integrity of the seam bond is warranted for 10 years by Mannington's **Seam + Advantage warranty**.

The benefits of Seam + Advantage

- Infection Control
- Seam Advantage Warranty
- Removes the need for transitional strips
- Unnecessary visual obstacles

Transition Strip VS No Transition strip

The benefits of Seam + Advantage
