

A woman with long brown hair, wearing a red and black plaid shirt and blue jeans, is sitting on a modern black metal chair with a tan cushion. She is smiling and looking down at a blue laptop resting on her lap. To her right is a small, round, black metal side table with a wooden top, which has a yellow folder or book on it. In the background, there is a large window with a view of a snowy landscape, a potted plant, and a teal armchair. The floor is a light gray, textured material.

## ABMARATHON®

A rubber flooring collection that is not afraid to be stepped on.

Made for high traffic environments  
Improved vulcanized rubber formula

- Easier to clean
- Improved stain resistance
- Improved colour stability, less shades

If your goal is to select **carbon- neutral materials**, ABMARATHON® can be produced with renewable natural gas made from organic waste, which reduces greenhouse gases at the source.

**Declare.**

### What is Declare?

The program provides a clear and informative label for building products and supports the Living Building Challenge's Red List for material transparency and toxic chemical avoidance as well as simplifying material specification and project certification.

### What is the Red List and what does it mean to be Red List Free?

The Red List represents the "worst in class" materials, chemicals, and elements known to pose serious risks to human health and the greater ecosystem. For a product to be awarded Red List Free status means that it does not contain any ingredients on the Living Building Challenge Red List.
