

GEO FLOORING

Meiso Collection

Ponder -- Roam -- Root

Referred to as one of the most enchanting groves on earth, the Sagano Bamboo Forest on the outskirts of Kyoto is a peaceful refuge for those in need of introspection.

It offers a serene escape for so many of the senses. The feel of fine gravel beneath your feet, the sight of structured stalks rising toward the sky, the haunting sound of rustling leaves, these are natural sensations that have the power to transport the mind to a better place, a happier place, a healthier place.

It's nature's ability to transport and restore that has inspired each of the three patterns within the Meiso Collection. Through organic patterning and inspired color, this collection is sure to provide a positive alignment with virtually any installation.
